NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

July 31, 2015 and 2014

(Unaudited - Expressed in Canadian Dollars)

1. NATURE OF BUSINESS AND GOING CONCERN

Long Harbour Exploration Corp. (the "Company"), which changed its name from Long Harbour Capital Corp. on June 9, 2011, was incorporated under the *Business Corporations Act* (British Columbia) on April 26, 2004. The Company's principal office is located at #1500 – 885 West Georgia Street, Vancouver, British Columbia, V6C 3E8. Canada. Since August 5, 2008, the Company has been engaged in sourcing, reviewing and acquiring high potential business opportunities, including the mineral resource sector.

The Company had held a 100% interest in five mineral dispositions in the Athabasca Basin in northern Saskatchewan. Four of the claims are referred to as the 2Z Lake Property and the other claim is called the Madison Property, collectively (the "Properties"). Although the Properties maintain high exploration potential the Company decided to sell 75% of the Properties (Notes 4 and 5).

The Company continues to evaluate business opportunities in both the mining exploration and non-mining sectors.

As at July 31, 2015, the Company had an accumulated deficit of \$2,565,160 and working capital of \$251,624. In the immediate term, the Company's ability to continue as a going concern is dependent upon its ability to raise additional capital to fund its ongoing business operations. Additional capital may be sought from existing shareholders and creditors and from the sale of additional common shares or other equity or debt instruments. There is material uncertainty about whether the Company will be able to obtain the required financing. This material uncertainty casts significant doubt about the Company's ability to continue as a going concern. Should the Company be unable to obtain additional financing, it may have no alternative but to significantly curtail, or cease to carry on, business operations.

2. STATEMENT OF COMPLIANCE AND BASIS OF PREPARATION

Statement of Compliance

These condensed consolidated interim financial statements are prepared in accordance with International Accounting Standard ("IAS") 34 Interim Financial Reporting under International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB"). These condensed consolidated interim financial statements follow the same accounting policies and methods of application as the Company's most recent annual financial statements but do not contain all of the information required for full annual financial statements. Accordingly, these condensed consolidated interim financial statements should be read in conjunction with the Company's most recent annual financial statements, which were prepared in accordance with IFRS as issued by the IASB.

Basis of Measurement

The condensed consolidated interim financial statements have been prepared on a historical cost basis, as modified by the revaluation of available-for-sale financial assets and derivative liabilities at fair value through profit or loss. The condensed consolidated interim financial statements are presented in Canadian dollars, which is also the Company's functional currency, unless otherwise indicated. The preparation of financial statements in compliance with IFRS requires management to make certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies. The areas involving a higher degree of judgment of complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in the notes to the annual audited financial statements of the Company as at October 31, 2014.

The condensed consolidated interim financial statements include the accounts of the Company and its wholly-owned subsidiary, 0930646 British Columbia Ltd. Subsidiaries are all corporations over which the Company is able, directly or indirectly, to control financial and operating policies, which is the authority usually connected with holding majority voting rights. Subsidiaries are fully consolidated from the date on which control is acquired by the Company. They are de-consolidated from the date that control by the Company ceases.

3. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the Company are set out in Note 3 to the annual audited Consolidated Financial Statements as of and for the year ended October 31, 2014, which are incorporated herein by reference. The reader is referred to those statements for a detailed discussion of the accounting policies. These condensed consolidated interim financial statements as at and for the nine month period ended July 31, 2015 have been prepared in accordance with the policies described in the annual audited Consolidated Financial Statements, which have been applied consistently to these financial statements.

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions. The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive income in the year of the change, if the change affects that year only, or in the year of the change and future years, if the change affects both.

Long Harbour Exploration Corp.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS July 31, 2015 and 2014 (Unaudited - Expressed in Canadian Dollars)

The following is a summary of share options outstanding and exercisable at July 31, 2015:

<u>Number of share options outstanding</u>	<u>Exercise Price</u>	<u>Number of share options exercisable</u>	<u>Expiry date</u>
22,500	\$2.00	22,500	September 30, 2016
<u>22,500</u>	<u>\$2.00</u>	<u>22,500</u>	

During the year ended October 31, 2012, the Company granted 30,000 share options to an employee. The options vested 1/6 semi-annually from the date of grants. These options expired during the year ended October 31, 2014, and no further stock based payments have been recognized in these financial statements.

The fair value of share options awarded was estimated on the date of award using the Black-Scholes option pricing model with the following assumptions:

Risk-free interest rate	1.38%
Estimated volatility	107%
Expected life	4.5 years
Estimated forfeiture rate	0%

The weighted average fair value of share options awarded during the year ended October 31, 2012, estimated using the Black-Scholes option pricing model, was \$ 2.00 per option. The weighted average remaining contractual life of the outstanding and exercisable options at October 31, 2014 was 1.98 years (2013 – 2.98). The Black-Scholes option pricing model requires the input of highly subjective assumptions, particularly as to the expected price volatility of the stock. Changes in these assumptions can materially affect fair value estimates.

8. RESERVES

As of July 31, 2015 and October 31, 2014, the reserves of the Company were as follows:

	<u>July 30, 2015</u>	<u>October 31, 2014</u>

Total reserves	<u>119,466</u>	<u>149,485</u>

During the nine month period ended July 31, 2015, \$30,218 was transferred to deficit from stock option reserves due to the expiry of 42,500 previously issued stock options.

10. MANAGEMENT OF CAPITAL

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company defines capital that it manages as share capital, cash and cash equivalents and short-term investments. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

11. FINANCIAL INSTRUMENTS

Fair value

The Company's financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of input described in the following hierarchy:

- Level 1 - applied to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.
- Level 2 - applies to assets or liabilities for which there are inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly such as quoted prices for similar assets or liabilities in active markets or indirectly such as quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions.
- Level 3 - applies to assets or liabilities for which there are unobservable market data.

The Company's financial instrument recorded at fair value consists of cash and available for sale securities are measured based on Level 1 inputs.

The fair value of amounts receivable and accounts payable and accrued liabilities approximate their fair value due to their short-term nature.

Financial risk management objectives and policies

The Company's financial instruments include cash, accounts payables and accrued liabilities. The risks associated with these financial instruments and the policies regarding their management are discussed below. Management monitors these risk exposures to ensure appropriate measures are implemented in a timely and effective manner.

Interest rate risk

The Company is not exposed to significant interest rate risk.

Credit risk

Credit risk is the risk of an unexpected loss if counterparty to a financial instrument fails to meet its contractual obligations. The credit risk associated with cash is believed to be minimal as cash is on deposit with Canadian and foreign banks that are believed to be creditworthy. The Company does not believe it is exposed to significant credit risk.

Long Harbour Exploration Corp.

NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS July 31, 2015 and 2014 (Unaudited - Expressed in Canadian Dollars)

Liquidity risk

Liquidity risk is managed by ensuring sufficient financial resources are available to meet obligations associated with financial liabilities; however, it cannot guarantee that it will continue to be able to meet its going-forward obligations.

12. EVENTS SUBSEQUENT TO THE REPORTING PERIOD
